ABOUT THIS TRAINING COURSE

Bioforce, thanks to the support of Action Against Hunger (ACF France) and OXFAM, is able to launch today the English version of « STOP COVID-19 – Essentials for the prevention and control of the virus », a freely accessible, on-line, succinct and practical, self-learning tool, aimed at national and international actors deployed for the prevention and control of the virus in local communities where confinement is particularly difficult.

In countries where the health systems is already fragile and where confining the population is impossible, **mitigating the spread of the virus** and protecting front-line staff and volunteers **is an absolute priority**. In such contexts, large scale communication and application of preventive measures is critically important, and building awareness of the population has become a **major public health challenge**. This mission will be carried out by a wide variety of actors (State, community based organisations, national and international humanitarian organisations ...) working with local communities, both in urban and rural areas.

Bioforce, whose mandate is to train humanitarian actors working in crisis situations, is making the STOP COVID-19 learning tool available to this wide range of actors working directly with the affected populations. Our objective is to rapidly provide those frontline actors with the means to inform and protect **efficiently and safely**.

STRENGTHS OF THE TRAINING COURSE

- freely accessible
- on-line
- succinct
